

PART	DESCRIPTION	FEATURES	APPLICATIONS
8045	1/32" white closed cell polyethylene foam coated one side with an aggressive rubber based adhesive.	-Excellent balance of tack and peel characteristics	-Industrial mounting tape -General purpose product assembly
8044	1/16" white closed cell polyethylene foam coated one side with an aggressive rubber based adhesive.	-Excellent balance of tack and peel characteristics	-Industrial mounting tape -General purpose product assembly
8154	1/8" white closed cell polyethylene foam coated one side with an aggressive rubber based adhesive.	-Excellent balance of tack and peel characteristics	-Industrial mounting tape -General purpose product assembly
8101	1/32" white closed cell polyethylene foam coated both sides with an aggressive rubber based adhesive.	-Excellent balance of tack and peel characteristics	-Industrial mounting tape -General purpose product assembly
8114	1/16" white closed cell polyethylene foam coated both sides with an aggressive rubber based adhesive.	-Excellent balance of tack and peel characteristics	-Industrial mounting tape -General purpose product assembly
8147	1/8" white closed cell polyethylene foam coated both sides with an aggressive rubber based adhesive.	-Excellent balance of tack and peel characteristics	-Industrial mounting tape -General purpose product assembly
8134	1/32" white closed cell polyethylene foam coated one side with a high performance, aggressive rubber based adhesive.	-Very high shear strength -Retains good tack and peel characteristics -Excellent aging properties	-Industrial mounting tape -High performance industrial tape fastener and product assembly
8133	1/16" white closed cell polyethylene foam coated one side with a high performance, aggressive rubber based adhesive.	-Very high shear strength -Retains good tack and peel characteristics -Excellent aging properties	-Industrial mounting tape -High performance industrial tape fastener and product assembly
8047	1/8" white closed cell polyethylene foam coated one side with a high performance, aggressive rubber based adhesive.	-Very high shear strength -Retains good tack and peel characteristics -Excellent aging properties	-Industrial mounting tape -High performance industrial tape fastener and product assembly
8105	1/32" white closed cell polyethylene foam coated both sides with a high performance, aggressive rubber based adhesive.	-Very high shear strength -Retains good tack and peel characteristics -Excellent aging properties	-Industrial mounting tape -High performance industrial tape fastener and product assembly
8115	1/16" white closed cell polyethylene foam coated both sides with a high performance, aggressive rubber based adhesive.	-Very high shear strength -Retains good tack and peel characteristics -Excellent aging properties	-Industrial mounting tape -High performance industrial tape fastener and product assembly
8145	1/8" white closed cell polyethylene foam coated both sides with a high performance, aggressive rubber based adhesive.	-Very high shear strength -Retains good tack and peel characteristics -Excellent aging properties	-Industrial mounting tape -High performance industrial tape fastener and product assembly
8053	1/32" white closed cell polyethylene foam coated one side with an acrylic adhesive.	-Excellent balance of tack, peel and shear characteristics -Excellent aging properties -Very good water resistance	-Industrial mounting tape -High performance industrial tape fastener and product assembly
8054	1/16" white closed cell polyethylene foam coated one side with an acrylic adhesive.	-Excellent balance of tack, peel and shear characteristics -Excellent aging properties -Very good water resistance	-Industrial mounting tape -High performance industrial tape fastener and product assembly

8055	1/8" white closed cell polyethylene foam coated one side with an acrylic adhesive.	-Excellent balance of tack, peel and shear characteristics -Excellent aging properties -Very good water resistance	-Industrial mounting tape -High performance industrial tape fastener and product assembly
8056	1/32" white closed cell polyethylene foam coated both sides with an acrylic adhesive.	-Excellent balance of tack, peel and shear characteristics -Excellent aging properties -Very good water resistance	-Industrial mounting tape -High performance industrial tape fastener and product assembly
8057	1/16" white closed cell polyethylene foam coated both sides with an acrylic adhesive.	-Excellent balance of tack, peel and shear characteristics -Excellent aging properties -Very good water resistance	-Industrial mounting tape -High performance industrial tape fastener and product assembly
8058	1/8" white closed cell polyethylene foam coated both sides with an acrylic adhesive.	-Excellent balance of tack, peel and shear characteristics -Excellent aging properties -Very good water resistance	-Industrial mounting tape -High performance industrial tape fastener and product assembly
