

MEDICAL BREATHABLE URETHANE FILM (NO ADHESIVE)

PART	DESCRIPTION	FEATURES	APPLICATIONS
8175	1 mil clear urethane film.	<ul style="list-style-type: none">-Low coefficient of friction-Highly breathable-Excellent fluid barrier-Very soft and conformable; skin-like feel	<ul style="list-style-type: none">-Breathable thin film wound dressings-Urethane film laminations
8182	1 mil clear urethane film.	<ul style="list-style-type: none">-Good breathability-Excellent fluid barrier-Very soft and conformable; skin-like feel	<ul style="list-style-type: none">-Breathable thin film wound dressings-Urethane film laminations
8183	1 mil clear urethane film.	<ul style="list-style-type: none">-High tensile strength, yet breathable-Excellent fluid barrier-Very soft and conformable	<ul style="list-style-type: none">-Breathable film applications where high film strength is needed
8136	1 mil clear urethane film available on paper or film carrier.	<ul style="list-style-type: none">-A variety of paper and film carriers allow for ease of use and converting-Good die-cutting ability-Highly breathable-Fluid barrier-Very soft and conformable; skin-like feel	<ul style="list-style-type: none">-Breathable thin film wound dressings-Urethane film laminations-Use film carrier where clear product is needed
8166	1 mil clear urethane film supported by a polyethylene carrier.	<ul style="list-style-type: none">-Polyethylene carrier allows excellent ease of use and converting-Highly breathable-Excellent fluid barrier-Very soft and conformable; skin-like feel	<ul style="list-style-type: none">-Breathable thin film wound dressings-Urethane film laminations-Clear carrier can be used in products where good clarity is needed
8185	1 mil clear urethane film supported by a polyethylene carrier.	<ul style="list-style-type: none">-Polyethylene carrier allows for easier converting-Highly breathable-Excellent fluid barrier-Very soft and conformable; skin-like feel	<ul style="list-style-type: none">-Breathable thin film wound dressings-Urethane film laminations

Urethane films are available in other thicknesses.
